# 100ft Folding Container for South Ossetia

What is a folding shipping container?

The Folding Shipping Container is an essential part of our Prefabricated Building offerings. Materials commonly used in prefabricated building construction include steel, concrete, wood, and glass. Each material offers unique advantages in terms of strength, durability, and design flexibility.

How many foldable containers can a 40ft container load?

One 40ft container can load 8-10 sets of foldable containers. The base plate of the foldable container is made of thick, high-quality galvanized steel, and the sidewalls use high-strength polyurethane insulation board for thermal insulation. Seamless splicing of the container body, strong sealing. You can install these foldable containers easily.

What is a foldable container?

Foldable container is a square design which increases over 4% space compared with traditional structure. All production finishes in the factory, direct field use which will reduce over 90% construction waste. The foldable container is a good choice whether it is used as a residential house or an office. Robust, safe and affordable.

Why should you buy a folding shipping container?

Upgrade your Prefabricated Building with the elegant and durable Folding Shipping Container. Purchasing prefabricated building products wholesale brings cost savings, bulk purchasing discounts, and streamlined supply chains. Wholesale suppliers offer customization options and consistent quality assurance.
