# Addis Ababa Power Base Station Distribution

What is the power supply system in Addis Ababa?

Power supply system Transmission network supplying power to Addis Ababa Capital Region consists of 400kV, 230kV, 13 kV and 45kV. Distribution network consists of 33kV and 15kV middle voltage distribution line by step down transformer rated at 132/33kV, 132/15kV 50 Hz using 3-phase 4-wire distribution line.

What is the power demand in Addis Ababa?

Power demand is 10.9%. With such a smooth economic growth, construction of industrial sector and housing are developing rapidly and the power demand in Addis Ababa administration area and an approximate 50km radius area around the city (hereinafter called "Addis Ababa Capital Region") is expected to increase from 800MW in 2014 to 3,576MW in 2034.

Will Addis Ababa be a model case?

Yes. Addis Ababa would be a model case by improving current power situation in distribution system. It is important for continuous economic growth in Ethiopia, and also Addis Ababa will take initiative for improvement of power sector situation.

How is the distribution network implemented in Addis Ababa?

The distribution network in Addis Ababa is implemented with 15kV or 33kV on the primary side (medium voltage) and 400V/230V on the secondary side (low voltage), and most of the facilities are formed by overhead distribution.

The rapid growth of mobile data traffic is putting a strain on wireless networks. Infrastructure and spectrum sharing are two promising ways to alleviate this challenge on the ...

The project entails the rehabilitation and upgrading (in the short to medium term) of the transmission and distribution networks in Addis Ababa and its surrounding areas within ...

The outcome of Addis Ababa High Voltage Transmission Distribution Rehabilitation and Upgrading project (Holeta; Legetafo; Gelan; Debrezeit-3; Kaliti; Elala-Geda; Sebata 1; Sebata-2) ...

Power losses and poor reliability of power systems affect end-user satisfaction. Currently, the Motta distribution substation in Ethiopia is experiencing frequent power ...

Yemanehbrhan recalled the free distribution of LED lamps by the former Ethiopian Electric Light & Power Authority (EELPA), which managed to save up to 80KW from the grid ...

Among others, the Sabata-1 substation plays an imperative role in providing electricity power for Addis Ababa. The substation is more than fifty years old. The substation had a small ...

Ethiopia's investment in such comprehensive power transmission and substation infrastructure underscores its dedication to meeting the growing energy demands of the nation and ...

This thesis work attempts to thoroughly identify causes for power interruptions and customer dissatisfaction and discusses the design, reliability and operation and maintenance ...

Data for medium and high voltage transmission lines in Ethiopia. The data were compiled for the AICD study led by the World Bank. A variety of sources were consulted, ...

---

Abstract The uninterrupted operation of wireless communication services relies heavily on the stability of power supply systems for Base Transceiver Stations (BTS). This ...

Revised in April 2023, this map provides a detailed view of power sector infrastructure across Ethiopia, Eritrea, Djibouti and Somalia. The locations of power generation ...

Ginchi Power Distribution Station built with a cost of US\$ 8.4M in the West Oromia region, Ethiopia, has been inaugurated in the presence of H.E Dr. Seleshi Bekele, Ethiopia's ...
