
Blown fuse in circuit breaker in Mombasa

How do you fix a blown circuit breaker?

First, locate your circuit breaker or fuse box. Depending on the age of your home, you could have either. Once located, turn off the power supply to the affected circuit by flipping the corresponding switch or removing the fuse. Next, remove the blown fuse and replace it with a new one with the same amperage rating.

What happens if you blow a fuse or tripping a breaker?

Blowing a fuse or tripping a circuit breaker is a common issue, especially if you're a multitasker. If you overload a circuit, your system will cut off the electrical flow to prevent your wires from overheating and causing circuit damage or fire. Follow these steps to restore power and get all those appliances going again:

Can a blown fuse be reset?

Like breakers, fuses protect your electrical system from overloads caused by loose wires, faulty outlets, or too many devices running on the same circuit. However, instead of tripping, a fuse blows or burns out when overloaded. Once this happens, it can't be reset--a blown fuse must be replaced to restore power safely.

What Is a Blown Fuse?

What happens if a fuse blows?

When a fuse blows, its ribbon burns, and all the lights, outlets, appliances, and fixtures powered by the circuit will lose power. There are two common causes of blown fuses: Overload: Too many lights or plug-in appliances drawing power from the same circuit will cause an overload.
