Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

How long will a battery energy storage system last in Romania?

It is about to start building the BESS in Scornicești in Olt county, west of Bucharest. R.Power is planning to complete it in a year. The battery energy storage system would have a duration of two hours, translating to 254 MWh in capacity. The project received funding from the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR).

Will Romania install a battery storage system on the Danube?

State-owned Hidroelectrica, the largest electricity producer in Romania, wants to install a battery storage system at Iron Gate 2 (Portile de Fier 2) on the Danube. Located on the border with Serbia, it is the second-largest hydroelectric plant in the country, at 252 MW in nominal capacity.

How much does Engie's battery storage project cost?

Economica.net learned that the battery storage facility would have 5 MW and a two-hour duration, costing the firm EUR 2 million. Engie's project was included in the reserve list last September after a public call for support to battery storage. The Ministry of Energy selected 13 applications for grants from NRRP.

Imagine this: Bucharest's energy storage systems now have enough capacity to power every lightbulb in Romania for 47 minutes. Not bad for a country that once relied on ...

Why Energy Storage Chassis Matters in 2024 As Bucharest aims to achieve 35% renewable energy integration by 2026, the energy storage chassis has emerged as the unsung hero. You ...

Clean, Resilient Energy to Meet Romania's Growing Needs As Romania accelerates its transition to a sustainable energy future, energy storage is becoming a key ...

Global Trends Bucharest Is Riding--and Beating While others talk about long-duration storage, Romania's capital is already testing 100-hour systems. They've even turned ...

Who Cares About Energy Storage in Bucharest? (Hint: Everyone) Let's cut to the chase: Bucharest energy storage isn't just a niche topic for engineers. From factory owners ...

According to Wechat Official Account @EnergyStorage001,, China Energy Engineering Corporation (CEC) and Romanian Venerable EPC Company formally signed a ...

A Strategic Investment in Romania battery storage for Grid Modernization The Electrica Group, a leading player in the Romanian energy sector, has announced a significant ...

The Ministry of Energy announced the relaunch of the project call Support for investments in developing electric energy storage capacities (batteries) related to Investment 4 ...

Although financial details have not been disclosed, the initiative forms a strategic pillar in the company's aim to transition into a leader of the energy-transition in Romania. The ...

Power up your energy business La Bucharest Energy Storage - Expo& Conference vei afla informatii complete despre despre avantajele implementarii solutiilor de stocare, de la autoritati ...

Furthermore, Romania launched an EUR 150 million program for behind-the-meter battery energy storage systems developed in conjunction with existing renewable energy ...
