
Can Boston do solar energy storage

Why should you choose Boston Solar?

Boston Solar takes a unique, New England pride in helping homeowners and business owners reduce their carbon emissions through custom solar installation. In fact, in our 8 years in business, solar systems we have installed over 4,000 solar energy systems, totaling 33,000 kW. That's enough to generate more than 30 MILLION kWh a year!

How many energy storage facilities are there in Massachusetts?

The Massachusetts Energy Siting Facilities Board has approved two energy storage facilities with a combined capacity of 400 MW/800 MWh. This decision overturns previous rulings that hindered the development of these facilities. Once operational, they will fulfill 80% of the state's 1 GWh energy storage deployment target for 2025.

Why did the Commonwealth overrule solar and storage projects?

The Commonwealth overruled the decisions of its own siting boards and one town's moratoria on all solar and storage projects, paving the way for the imminent construction of two significant energy storage facilities.

How many MWh will energy storage be achieved by 2025?

The Act established a 1,000 MWh energy storage target to be achieved by December 31, 2025. The Act requires each electric distribution company annually report energy storage installations in their territory no later than February 15. Progress
