
Can more solar panels be added to solar lights

Should I add solar panels to my existing system?

If you add solar panels to an existing system, you can increase your solar electricity generation, extend the life of your installation, and create further savings on utility energy costs.

Do I need more solar panels if I have a battery?

You can think of a battery as an extra appliance - if there isn't enough solar power to charge it, it has to charge from the grid. So, if you want your battery system to run completely off solar power, you may need more panels. But it depends on what you're using your battery storage for.

Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system. Why add solar panels to an existing solar system?

Can I add more solar panels to my home?

Most of the time, you can add more solar panels to your home. The economics will probably look a lot different than the first time you went solar. (And if you live in a state like California that upended its solar incentives, you're probably better off leaving your old setup alone.)
