
Chile Wind Power Energy Storage Station

Where are Chile's battery energy storage facilities located?

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage. The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá; the country's solar powerhouses.

Will Chile support the energy transition?

A spokesperson for Engie Group told Dialogue Earth that Chile is seen as one of its strategic countries for supporting the energy transition, which "entails the investment of USD 1.8 billion by 2027. Our plan in Chile considers incorporating 1.4 GW to reach 2 GW of installed capacity in clean energy, including 2 GWh in storage systems".

Will Chile's storage capacity double in 2032?

The energy ministry spokesperson told Dialogue Earth that the country's environmental assessment body is currently assessing the viability of 300 more storage projects, with a total capacity of 16 GW. According to some projections, between 2026 and 2032, Chile's total storage capacity could double to 4 GW.

Why is Chile pursuing energy storage in Antofagasta?

Chilean president Gabriel Boric (centre) at the inauguration of an energy storage plant in the northern region of Antofagasta in April 2024. Chile has strong conditions for wind and solar energy, and is pursuing storage to help overcome intermittent supply (Image: Ximena Navarro / Dirección de Prensa, Presidencia de la República de Chile)

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS). ...

The energy landscape is witnessing a monumental shift as Tesla introduces its first utility-scale Megapack project in Chile, marking a significant milestone in sustainable energy ...

Chile maps out 85 energy storage projects The number of ongoing and planned energy storage projects in Chile reached 85 by August 2023, with their capacity totaling 6.4 ...

The Background ENGIE's 638 MWh BESS Coya project in Chile is set to become Latin America's largest energy storage facility and a global benchmark for DC-coupled solar-plus-storage. A ...

Chile's energy storage sector is experiencing significant growth, as outlined in the latest "Report on Projects Under Construction and Investment in the Energy Sector" by the ...

The results show that the sand lifting-thermal storage scheme can effectively improve the economic efficiency of the system. Its control effect can achieve the best wind ...

Huawei Digital Power has already secured over 3 GW of energy storage projects in Chile and more than 5 GW across Latin America. Its grid forming technology is already ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022. ...

The sharp growth in renewable energy production, and the pursuit of ambitious global targets on new

capacity, bring with them a significant challenge, alongside huge ...

With 23 energy storage projects already approved, totaling an impressive 3,000 MW of capacity, Chile is at the forefront of innovation and efficiency in Latin America.

Chile's Energy Storage Boom in Chile The central and northern regions of Chile will be the engine of this growth, with plans for 3,000 MW and 6,000 MW of energy storage ...
