
Compact power station factory in Kyrgyzstan

Why is China building a 100 MW solar power plant in Kyrgyzstan?

Kemin, Kyrgyzstan -- In a significant step toward enhancing Kyrgyzstan's energy infrastructure, China has begun construction of a 100 MW solar power plant in the city of Kemin, located in the Chuy Region. The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation.

How many hydroelectric plants are in Kyrgyzstan?

Kyrgyzstan currently operates 24 small HPP systems with a total capacity of 66.5 megawatt-hours, including nine hydroelectric plants managed by "Chakan HPP." In 2024, the President of Kyrgyzstan inaugurated the small HPP "Kok-Art" and the "Kainama" hydroelectric power station (HPP) in the Jalal-Abad region, as well as the "Bala-Saruu" HPP in Talas.

Will Kyrgyzstan build a hydroelectric power station on the Chong-Kemin River?

As per the agreement signed by Kyrgyzstan's Minister of Energy, Talaipek Ibraev, and the president of the Japanese company Muroo Systems Corporation, Pan Jong-sin, the construction of two small hydroelectric power stations (HPP) on the Chong-Kemin River in the Chuy region, in the north of the country, will begin with a total capacity of 24-25 MW.

What is Kyrgyzstan's solar project?

The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation. The solar plant, once operational, is expected to generate 155 million kWh of electricity annually, contributing to the country's energy needs while reducing reliance on fossil fuels.
