# Comparison of Off-Grid Solar Containerized Batteries in Southeast Europe with AC Batteries

Which battery is best for solar off-grid systems?

Lead-acid batteries have been a traditional choice for solar off-grid systems. They come in two main types: Flooded Lead-Acid (FLA) and Sealed Lead-Acid (SLA), including Absorbent Glass Mat (AGM) and Gel batteries. • Cost-Effective: FLA batteries are relatively inexpensive and widely available.

What are off-grid solar batteries?

Off-grid solar batteries store excess energy generated by solar panels. Without them, solar power is only usable when the sun shines--leaving you in the dark during cloudy days or nighttime. These batteries act as a reservoir, ensuring you have electricity on demand. Think of them as giant power banks for your home or RV.

What is an AC battery system?

AC battery systems, technically known as AC-coupled battery systems, contain an integrated inverter that enables them to operate as a stand-alone energy storage system for solar energy storage or backup power applications. Most of these systems can also be retrofitted to buildings with an existing solar installation.
