
Djibouti containerized generator manufacturer

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system? Put simply, yes.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered --500 kW to 1250 kW-- units packaged in 30-foot or 48-foot ISO containers.

A containerized system acts as a massive Uninterruptible Power Supply (UPS), keeping operations running smoothly until grid power is restored or diesel generators kick in.

Our line of containerized generators is easily configurable to the needs of any application, from rental to disaster relief to mining -- with a whole host of value-added standard features, ...
