
Guyana Tunnel Automated Folding Container Type

What is a tunnel shipping container?

Tunnel shipping containers are a popular choice for storage purposes. They have double doors at each end and they are easier to open than traditional containers. They are an excellent choice for retail stores and warehouses. They are also simple to convert, and can be modified for many different purposes.

What is a 40ft tunnel container?

The 40ft tunnel container is a foot higher in height over conventional containers. This makes it ideal for transporting and storing higher-height objects. These containers share the same structural integrity of standard ISO containers but come with double doors at each end.

Why do customers choose tunnel containers for easy loading?

Customers choose tunnel containers for easy loading. It is because a tunnel container has doors on both ends. These made the tunnel container particularly practical for quick item loading and unloading. They are crucial for shipping steel or other heavy metals due to the open doors' extra space.

What is an open top tunnel container?

Open top The open top tunnel container is a particular kind of shipping container that has two access points. This makes it much easier for shippers to load cargo and reduces delays and handling time. It also offers greater flexibility when loading different types cargo, such as vehicles and machinery.
