Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

Will China establish a beachhead for 6g?

In fact, Chinese academic researchers and telecom operators are leaving no stone unturned in efforts to establish a beachhead for 6G. In July, China developed the world's first 6G field test network that integrates communications and intelligence, demonstrating that the transmission capabilities of 6G can be reached on 4G and 5G technologies.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

About Co-construction of 5G base stations with Hetong Communications video introduction Our solar container solutions encompass a wide range of applications from residential solar power ...

Hunan's "Empowering Enterprises with Intelligence" campaign has been steadily advancing. In the first half of this year, there were 22,000 newly-built 5G base stations ...

China ended 2024 with over 4.19 million 5G base stations China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to ...

This undated file photo shows a staff member installing equipment on a 5G base station in northwest China's Xinjiang Uygur Autonomous Region. (Xinhua) The number of 5G ...
