What size inverter do I Need?

Inverters come in different sizes starting from as little as 125 watts. The typical inverter sizes used for residential and commercial applications are between 1 and 10kW with 3 and 5kW sizes being the most common. With such an array of options, how do you find the right size for you? An inverter works best when close to its capacity.

What are the different solar inverter sizes?

Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly. During our research, we discovered that most inverters range in size from 300 watts up to over 3000 watts. In this article, we guide you through the different inverter sizes.

What is the inverter size calculator?

The Inverter Size Calculator is a valuable tool for determining the appropriate inverter size based on your power needs and electrical load. It is widely used in selecting inverters for residential, commercial, and solar applications, ensuring that the inverter's capacity matches the required energy demands efficiently.

What wattage should a solar inverter be?

The inverter wattage must be the same or greater than your solar panel's watts. Here is a chart that shows the watts consumption of various appliances and what inverter size you will need. Note that this guide includes a 20% safety margin for the inverter watts. This safety percentage can be adjusted.

Calculate the ideal inverter size with the Inverter Size Calculator. Perfect for selecting inverters for homes, solar panels, or vehicles based on power requirements.
