
Kiribati installs solar air conditioner

Is Kiribati launching a solar PV project?

The Oceania located nation of Kiribati has started construction on the country's largest solar PV project that's backed by the Asian Development Bank and the Government of New Zealand. It will be accompanied by a battery energy storage system (BESS). The 7.5 MW South Tarawa Renewable Energy Project (STREP) is located on the Bonriki water reserve.

Does Kiribati have solar power?

In line with these goals, Kiribati has initiated projects to expand solar power generation, with the support of international partners like the World Bank and the Green Climate Fund.

How is Kiribati developing?

Another significant area for development is Kiribati's energy infrastructure. With a high reliance on diesel fuel for electricity, the country is looking to shift toward renewable energy sources as part of its broader efforts to combat climate change and ensure energy security.

Does Kiribati need a new transportation system?

With the country heavily reliant on fishing and agriculture, the Kiribati government has prioritised projects aimed at upgrading its infrastructure and energy systems to support sustainable economic development. One of the most urgent needs in Kiribati is the modernisation of its transportation infrastructure.
