
Mexico's first energy storage solar power plant

Why is energy storage important in Mexico?

Renewable energy resources like solar and wind fluctuate, making energy storage systems (ESS) important for balancing supply and demand. In Mexico, which has abundant solar and wind resources, energy storage facilitates the efficient use of generated renewable electricity. It smoothes out the variability and ensures a stable power supply.

How many power plants will Mexico install in 2022?

A plan concerning the installation and retirement of power plants, prepared as part of the National Electric System's development program, projected Mexico could install 4.5 GW of energy storage sites between 2022 and 2036.

Will energy storage attract renewables investment in Mexico?

With Mexico's president-elect having announced an intent to attract renewables investment, energy storage was the subject of much discussion at the Intersolar Mexico trade show.

Will Mexico generate 54% of its electricity from renewables?

President-elect Claudia Sheinbaum Pardo has already announced a national energy plan focused on driving renewables investment, expanding electromobility, and modernizing ageing grid infrastructure with the aim of Mexico generating 54% of its electricity from renewables, up from 12.1% today.

The solar plant is on a 2000ha plot in the desert of Puerto Peñasco, Sonora. It produces power using photovoltaic technology as well as battery energy storage and is ...

Mexico's energy sector stands at a critical crossroads. While the country boasts immense potential in solar and wind resources, the path to a sustainable and secure energy ...

A plan concerning the installation and retirement of power plants, prepared as part of the National Electric System's development program, projected Mexico could install 4.5 GW ...

EES connected to a power plant - energy storage within units generating energy from renewable sources (RES), sharing the point of connection to the grid. EES integrated ...

Renewable energy resources like solar and wind fluctuate, making energy storage systems (ESS) indispensable for balancing supply and demand. In Mexico, which has abundant solar and ...

Mexico's energy sector has unveiled a groundbreaking policy, stirring up the global energy storage market and introducing new variables to its development path. Recently, the ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

BESS storage infrastructure at ENGIE solar plant: key to managing renewable intermittency and accelerating the energy transition in the region. Elements that promote a just ...

Mexico's president Andres Manuel Lopez Obrador, popularly known as AMLO, on Friday inaugurated the first phase of the Puerto Peñasco solar-plus-storage power plant in the ...

CFE plans to build a Floating Solar Power Plant, with a loan of EUR\$150 million (US\$161.2 million) from

the AFD. This project, the first in Mexico and Latin America, will ...

Mexico is experiencing a rapid acceleration in large-scale solar and energy-storage proposals, following the government's rollout of a new decree in mid-October that ...

On February 18, 2023 (Beijing time), CPID's first overseas energy storage project was put into official operation in Sonora, Mexico. The project is an energy storage project supporting CFE's ...
