# New Energy Battery Cabinet Subsidy Policy

What happens if the government provides a subsidy for new batteries?

However, when the government provides the subsidy, with the increase of  $k$  new, the selling price of new batteries remains unchanged, and the quantity of new batteries purchased by the PGC decreases, so the profit for the battery manufacturer declines.

Can power battery recycling benefit from a government subsidy?

They found that the original profit-sharing status would change after the government subsidy was introduced into the model. In conclusion, the government has noted that the power battery recycling industry can reap more benefits. The government's policies are relatively broad, with most documents and policies being macrolevel guidance.

Does a subsidy policy promote the echelon utilization of retired batteries?

Specifically, considering that the government develops a subsidy policy for the purchase of retired batteries, the study explores the government's optimal subsidy and its impact on the decisions and profits of supply chain members, thereby examining the effectiveness of the subsidy policy in promoting the echelon utilization of retired batteries.

Can government subsidies help recycle EOL power batteries?

Government subsidies can promote recycling companies and consumers to actively recycle EoL power batteries. The government hopes to achieve the goal of optimal total social gain by employing subsidies. However, the government will only act if the net benefit to society is greater than the subsidy paid by the government.

The development of the power battery industry is still in its infancy in China, and relatively little research has been conducted to evaluate power battery industry policies. ...
