What is a solar inverter?

A solar inverter is a critical component of a solar energy system, responsible for converting the direct current (DC) power generated by solar panels into alternating current (AC) power that can be used to power homes and businesses. The process of converting DC to AC involves several stages, including the following:

The inverter is a critical part of any Solar array. It converts the high voltage DC current that is generated by a PV module into low voltage AC current which is necessary to make the energy ...
