## Outdoor power hours

How long does a portable power station last?

Like any battery, for example one in a phone or laptop, this will wear down over time until the power station no longer holds charge. General estimates put the lifespan of a portable power station at around ten years. Expect it to last approximately five years minimum with standard use. What can you run on a portable power station?

Do power stations have a light bar?

Some portable power stations have a light bar built into the housing, which is useful for seeing at night. Anker's Solix C300 also includes a pop-up camping light. A few final words of advice if you're about to become a power station parent -- wait, parent? Yes. Power stations are not without hassle.

How much power does a portable power station hold?

On the small end, portable power stations hold around 300 Wh (like the little EcoFlow River 3 Plus, our Best Budget pick). These little ones are generally smaller than a lunchbox and good for tasks like recharging laptops and speakers, LED lighting, and small fans.

What temperature should a power station be stored?

Power stations are not without hassle. They should not be stored or discharged/charged in extreme temperatures. In general, they should always be stored between 0 degrees F and 105 degrees F and never used (charged or discharged) below 32 degrees F, though that varies a bit by model and brand.
