
Philippines inverter conversion for home use

What is a solar power inverter in the Philippines?

A solar power inverter in the Philippines not only converts the energy from the sun to usable energy but also serves as a communicating device that tells whether your solar PV system is experiencing problems.

How long does a solar power inverter last in the Philippines?

At Solaric, solar power inverters we've installed throughout the country resulted in drastic monthly electric bill drops, with homeowners noticing up to 50% reduction in their bills. If you purchase a solar power inverter in the Philippines, you can expect to recover from your investment within 6 to 7 years of use.

What is a solar power inverter?

You can say it is the brain or center processing unit of solar PV systems. A solar power inverter functions by converting the direct current (DC) output of a solar PV system into an alternating current (AC). AC is fed into your home to power all your items that need electricity including appliances and gadgets.

Should I buy a solar inverter?

The price for such a system is quite high, as these inverters are usually more expensive. Also, you'll need more solar panels and a bigger battery to power your home for a few hours during a power outage. I recommend allowing power supply only for essential circuits in such situations, such as the refrigerator, a few lighting installations.
