
Portable Generator Container

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Do you need a container for a portable generator?

Whether you call it a box, shed, shelter, or enclosure, your generator needs to be protected and integrated into the environment around it. Here are some of the best reasons for building a container for your portable generator.

Where can you use a portable generator?

A portable generator can be used in various places. You can bring one to a construction work site for your power tools or to a campsite for your TV, lights, and electric fan. It can also make life more comfortable at home during power outages.

What are the enclosures of portable generators?
