
Replacing a breaker in China in New-Zealand

Should you upgrade your electrical system in an old home in New Zealand?

Upgrading the electrical system in an old home in New Zealand is a smart investment that improves safety, compliance, and energy efficiency. Whether it's replacing outdated wiring, upgrading the switchboard, or adding modern appliances, careful planning is key to a successful upgrade.

Where can I buy electrical products in New Zealand?

DIY Retailers: Larger retailers like Bunnings and Mitre 10 offer a range of products, though they may not have specialized items. Ensure that all electrical products comply with New Zealand standards. SDOCs confirm that the products meet regulatory requirements and are safe for use.

How much does it cost to replace a switchboard?

Replace outdated switchboards with modern units that include circuit breakers and RCDs for enhanced protection. Cost: \$1,500-\$2,500 depending on complexity. Older homes often lack sufficient sockets. Installing extra power points with USB outlets ensures you avoid overloading circuits. Cost: \$50-\$200 per outlet.
