## School uses Chadian photovoltaic containers for communication

Will a solar PV plant be a "pioneering project" in Chad?

The European Investment Bank (EIB) described the solar PV plant as a "pioneering project" that "will help liberalise the energy sector, and mobile private investment in Chad." It is calculated that the cost of electricity will be less than half the current cost of power following the project.

Why should we invest in solar power in Chad?

It is an opportunity to improve energy access in Chad by developing its natural solar potential. Moreover, the Project will set a precedent for PPPs in the country and create an opportunity for replication for other solar power projects on the Sahel region in the framework of the Desert to Power Initiative.

How will the Djermaya power plant affect Chadians?

USAID'S Power Africa has guided tariff approaches, indicating that the Djermaya plant will produce electricity at a cost that is 40% less than existing sources. Overall, Chadians will have an increased access to cleaner, sustainable energy.

What is the Chad energy project?

The Project will help build sustainability in the electricity sector in Chad by reducing production costs; will increase installed capacity in the country and contribute 10% of the energy supplied to the interconnected system (the equivalent of 25,000 customers).

Overall, Chadians will have an increased access to cleaner, sustainable energy. In the long term, this project will provide a sustainable and reliable source of energy for the ...

The initial introduction toward the sustainable infrastructure has opened the door to realizing the new innovations in remote communication networks. The conventional power ...

On April 1st, 2025, Consul General in Willemstad Li Yigang visited the school rooftop solar photovoltaic power system project, which was jointly launched by the Ministry of Education, ...

The photovoltaic electronic classroom donated by the embassy today will inject new impetus into the flourishing education cooperation between the two countries.

A Primary School's Journey in Chad, Africa can teach you how to capture the power of sun? The head of a primary school in Chad, Africa, was aware of solar clean energy but unsure which ...

The PV minigrid serves as a model for replication and scalability across Chad and beyond. The minigrid will benefit more than 100 people in the communities, schools and ...

This suggests that PV technology for school electrification is still driven by local technical and investment capacity potential. Barriers to large-scale electrification of schools include upfront ...
