What is solar inventory?

Solar Inventory is inventory carried by solar companies and can include: The management of solar inventory comes with some specific challenges which it shares with other highly innovative industries which experience similar demand & price volatility and technological disruption.

How do solar companies manage inventory?

As a solar company, you may have warehouses across the country, each holding a different amount of inventory. Many companies have to manage the complexity of maintaining stock at multiple locations. In the solar industry, the need to keep equipment on individual crew trucks further complicates inventory management.

Can solar inventory be devalued?

Solar inventory can also get devalued because of frequent price drops. Sales cycles are not very predictable because demand is closely linked to consumers' energy bills, price volatility and incentives provided by governments. Solar Inventory management needs to help improve demand planning and liquidity/cash flow.
