
Solar glass plus UV

What is Photovoltaic Glass?

Unlike traditional solar panels that absorb visible light, photovoltaic glass converts primarily ultraviolet (UV) and infrared light into electricity, making it suitable for windows, facades and other transparent surfaces of buildings, vehicles and equipment.

What is photovoltaic smart glass?

Photovoltaic glass, also known as solar glass or transparent solar panels, is a type of smart glass that uses embedded photovoltaic cells to convert sunlight into electricity to generate electricity.

Why should you choose Sunguard solar plus glass?

The high durable coating of SunGuard Solar Plus glass makes it suitable for lamination with the coating against the PVB interlayer, without requiring edge deletion. SunGuard Solar Plus glass can also deliver optical clearness while helping to reduce energy consumption.

What is Sunguard® solar plus?

SunGuard® Solar Plus has a durable coating that offers high solar protection and natural light transmission, combined with a highly resistant coating.

We have manufactured the first photovoltaic glass in the market that comes with low-emissivity properties, provides UV and IR filter, promotes natural light, and generates power. ...

SCHOTT® Solar Glass keeps light working at its best! Its high and stable optical transmittance ensures that solar cells capture maximum energy, while advanced UV filtering and solarization ...

As a supplier of solar glass, I've witnessed firsthand the growing demand for this innovative product in various industries. One of the most frequently asked questions about ...

Discover the benefits of solar glazing for your home or building. Learn how this innovative glass technology can save on energy costs, provide superior insulation, and protect from UV rays, ...

Unlike traditional solar panels that absorb visible light, photovoltaic glass converts primarily ultraviolet (UV) and infrared light into electricity, making it suitable for windows, ...

As solar technology continues to advance, solar module glass has become one of the most critical components determining the performance, durability, and long-term reliability ...

Solar glass is an essential part of solar modules, providing the following key functions: (1) Light Transmittance: Solar glass features high light transmittance (typically >91%), maximizing ...

SunGuard® Solar Plus glass not only offers high solar protection and natural light transmission, but also very low emissivity and the ability to be applied monolithically. Meaning it can be ...
