
Special plan for new energy storage

What is the "Special Action Plan" for new energy storage?

The 'Special action plan for large-scale construction of new energy storage (2025-2027)' was published last Friday (12 September), formulated jointly by the country's National Development and Reform Commission and National Energy Administration (NEA).

What is the energy storage plan?

The plan outlined 21 key measures, including scaling up energy storage applications in power generation and grid infrastructure, accelerating technological innovation, and improving standardization. It also emphasized talent development and enhancing international cooperation in the sector.

What is China's Energy Storage plan?

The plan's target represents a significant scaling up, even for the world's leading adopter and producer of energy storage technologies. According to official National Energy Administration data from its recent 'China new energy storage development report 2025,' the country's installed base at the end of 2024 totalled 73.8GW/168GWh.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

The Coverage and Intensity of Policies Continuing to Increase Technological breakthrough and industrial application of new type storage are included in the 2023 energy ...

The National Development and Reform Commission and the National Energy Administration issued the "Special Action Plan for Large-Scale Construction of New Energy Storage ...

On January 9, the Shanghai Municipal Government released the "Action Plan for New Energy Storage ...

According to the Plan, by 2027, new-type energy storage will basically achieve large-scale and market-oriented development, with technological innovation and equipment ...

The Plan mentions that the multiple functions of energy storage, such as peak and frequency regulation, emergency standby, and capacity support, should be fully utilized. Combined with ...

The action to optimize the power system's regulatory capacity proposes exploring the application of a batch of new energy storage technologies. Focusing on the needs for ramp ...

China's nationwide installed capacity of new-type energy storage has exceeded 100 GW, more than 30 times the level at the end of the 13th Five-Year Plan period.

China aims to add more than 100 GW of new energy storage (primarily battery storage, excluding pumped hydro) by 2027, according to a new action plan presented by ...

The State Council released a circular on the implementation plan to promote the high-quality development of new energy in the new era, drawn up by the National ...

The plan outlined 21 key measures, including scaling up energy storage applications in power generation and grid infrastructure, accelerating technological innovation, ...

On Monday, eight ministries - led by the industry regulator (MIIT) and macro planner (NDRC) - issued an action plan to promote the manufacturing of new-type energy ...

Encourage local governments to introduce special policies to support technological progress in new-type energy storage system manufacturing as well as the transformation and upgrading of ...

The 'Special action plan for large-scale construction of new energy storage (2025-2027)' was published last Friday (12 September), formulated jointly by the country's National ...

This initiative, known as the 'Special Action Plan for Large-Scale Construction of New Energy Storage (2025-2027)', was collaboratively developed by the National ...

China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

Xinhua News Agency, Beijing, February 17 (Reporter Zhang Xiaojie and Zhang Xinxin) The reporter learned from the Ministry of Industry and Information Technology on the ...
