# Vanadium liquid flow battery for home energy storage

What is a vanadium flow battery?

Vanadium flow batteries are ideal for powering homes with solar energy. Compared to lithium batteries, StorEn's residential vanadium batteries are: Homes with solar panels need batteries to store energy collected during peak sun times so it can be used later, when it's dark, overcast, or during inclement weather.

Are vanadium redox flow batteries sustainable?

In the pursuit of sustainable and reliable energy storage solutions, Vanadium Redox Flow Batteries offer a compelling combination of safety, longevity, and recyclability - key attributes of any truly environmentally friendly and long-duration energy storage technology.

What is a residential vanadium battery?

Residential vanadium batteries are the missing link in the solar energy equation, finally enabling solar power to roll out on a massive scale thanks to their longevity and reliability. Residential vanadium flow batteries can also be used to collect energy from a traditional electrical grid.

Do vanadium flow batteries decay over time?

Vanadium flow batteries do not decay over time, maintaining 100% capacity for the life of the battery. Vanadium batteries also have a lifespan of more than 25 years, which is longer than most lithium-ion batteries. They are also more cost-effective than lithium-ion batteries.
