
Warsaw Communications Engineering Bureau installs 5g base station

Are mobile operators building 5G networks in Poland?

Mobile operators in Poland have been testing 5G technology and have begun preparations for building 5G networks. While early pilot projects were mostly based on Huawei technology, in later initiatives the operators have focused on Ericsson and Nokia.

Will Poland launch a 5G network in 2023?

The business plan for Polish 5G is yet to be developed but the goal is to launch a country-wide wholesale 700 MHz network in 2023. This is pioneering solution, yet to be consulted with the European Commission. Sales opportunities are open in Poland's 5G network development.

Will Polkomtel build a 5G network in Poland?

In addition, Polkomtel, of the Cyfrowy Polsat Group, announced moving forward with building the first 5G network in Poland but this has turned out to be a network based on 2600 MHz TDD technology, which is an advanced version of the existing LTE technology, allowing data transmission with the speed exceeding 500 Mb/s.

Will a 700 MHz network be incorporated into Polish 5G?

Integration of the 700 MHz infrastructure would considerably lower the cost and allow the operators to focus on the 3.4-3.8 GHz and 26 GHz networks. The business plan for Polish 5G is yet to be developed but the goal is to launch a country-wide wholesale 700 MHz network in 2023.
