
Which EK uninterruptible power supply is better

What is a good uninterruptible power supply (UPS)?

A good UPS for gaming computers or high-power computers with two monitors would have a 500-1000 VA capacity. For additional peripheral units, consider UPSs with a capacity higher than 1000 VA. Another important characteristic is UPS wireless productivity.

What is an uninterruptible power supply?

An uninterruptible power supply is an electric device that provides emergency power to the connected equipment in case the primary power source fails.

What is a 650V/390W uninterruptible power supply?

The 650V/390W uninterruptible power supply (UPS) features an Ecologic battery backup. It offers an automatic power saving mode and a multifunctional LCD panel, making it modern and convenient. This UPS uses a simulated sine wave output to protect workstations, network devices, and home entertainment equipment.

Does an ups have a battery & a power supply?

In most cases, an UPS incorporates a battery, a surge protector and a power supply in one unit, but most uninterruptible power supplies also have additional filters (RFI/EMI noise filtering and Automatic Voltage Regulation or AVR) that protect your equipment in case of brownouts, without relying on the battery power.
