
Which solar panel is better for home use

Which solar panel is best for home use?

This way, you can get the best price for your new system. Which type of solar panel is best for home use? Generally speaking, monocrystalline panels are the best option for home use. However, polycrystalline and thin-film panels can be good options depending on the size of the system and other factors specific to you.

How to choose a residential solar panel?

So, if you live in a hot climate, ensure you pick a panel with a lower coefficient ($-0.35\%/^{\circ}\text{C}$ is the industry average), as this will ensure better savings and higher energy production. Panel efficiency and wattage: Choose a residential solar panel with efficiency and wattage ratings that match your home's energy needs.

What is a good solar panel efficiency?

Efficiency is how much energy a solar panel can convert from the sun into usable energy for your home. The higher the efficiency, the better the panel, which is why solar panels with an efficiency of 22% or more score the best in this category.
